Professional Summary

Computer Science student focused on Backend Development, DSA, and modern web development. Experienced with React, TypeScript, Python, and REST APIs through personal projects. Currently learning software engineering fundamentals, Node.js, and backend development while building production-style projects.

Skills

- Programming Languages: Python, C++, JavaScript, TypeScript
- Frontend: React, HTML, CSS, Tailwind CSS
- Database: MySQL
- Tools: Git, GitHub, Docker (Basics), Figma, MS Office

Education

Bachelor of Technology (B.Tech) in Computer Science Engineering

Sardar Beant Singh State University, Gurdaspur | Graduation: 2029

Projects

- **Game Library Bay | [GitHub](#)** – React | TypeScript | Tailwind CSS
 - Built a responsive single-page application using React Router, TypeScript, and Tailwind CSS.
 - Implemented API integration, search & filtering, URL query parameters, persistent favorites, and reusable components.
- **Pomodoro Timer | [GitHub](#)** – React | TypeScript | Tailwind CSS
 - Built a customizable Pomodoro timer using React Hooks, Context API, and TypeScript.
 - Added configurable work/break sessions, localStorage persistence, accessibility improvements, and responsive UI.
- **Custom PC Build Recommendation System | [GitHub](#)** – Python | MySQL
 - Developed a terminal-based PC recommendation system using Python and MySQL with CRUD operations.
 - Implemented user authentication, admin management, and compatibility-based hardware selection.
- **DSA Repository | [GitHub](#)** – Python | Markdown
 - Built and maintaining a structured repository covering Python fundamentals, data structures, algorithms, and LeetCode solutions.
 - Document concepts with complexity analysis, implementations, and beginner-friendly notes for consistent learning.
- **GitHub Profile Searcher | [GitHub](#)** – HTML | CSS | JavaScript
 - Developed a GitHub profile search application using the GitHub REST API and Async/Await.
 - Implemented JSON data handling, error handling, and responsive UI for displaying user information.
